Reissue Application Declaration by the Inventor**

At least one error upon which reissue is based is described as follows:

During the prosecution of the application that issued as the above patent, the inventors did not recognize that the features disclosed in the patent in Figs. 1 and 13A were appropriate to claim. As such, the inventors did not claim all that they had a right to claim. This error was made without deceptive intent. Specifically, the inventors did not claim any one or more of the features of an optical disk having a data zone for recording information readable by light radiation; a track of spiral shape; and a barcode pattern formed by a laser on the track.

I hereby claim foreign priority benefits under 35 U.S.C. §119(a)-(d) or § 365(b) of any foreign application(s) for patent or inventor's certificate, or § 365(a) of any PCT international application which designated at least one country other than the United States, listed below and have also identified below, any foreign application for patent or inventor's certificate, or PCT International application having a filing date before that of the application on which the priority date is claimed:
